

Registration Form

Select the Program you want to attend:

☐

Seedling to Silhouette... 10 Years of Growth
Waynesboro Country Club

☐

Low Impact Rigging Seminar with ArborMaster®
Ridgeview Park

By September 2

Circle One

General Registration	\$85
Municipal / Non-Profit	\$75
Trees VA Member	\$65
Student	\$45

AFTER September 2 & Walk-In's \$95

MAKE CHECK PAYABLE TO TREES VIRGINIA

No refunds after September 2

One Form Per Person (photocopy as necessary)

Organization: _____

Name: _____

Address: _____

City: _____

State: _____ Zip: _____

Email: _____ Veggie lunch ☐

SEEDLING

10th Annual
Waynesboro Plant Health
Care for Urban Trees

to Silhouette

..... 10 YEARS
OF GROWTH

September 9, 2005

SEEDLING to Silhouette

September 9, 2005
Waynesboro Country Club

Registration & Exhibits: 7:45 - 8:15
Morning Program: 8:15 - 12:00

Welcome by Mayor of Waynesboro

Tree Kindergarden - Where Trees Get Their Start

Dr. Bonnie Appleton

*Professor of Horticulture and Extension Nursery Specialist,
Hampton Roads Agricultural Research and Extension Center*

Before you think about how to dig the best planting hole or whether or not to backfill with a structured soil, focus on early tree life issues like root density and depth. Nursery practices, from propagation to production to harvesting, holding, and shipping, can start your eventual landscape tree on the path to grade A or grade F. Our nurseries can graduate superior specimens if they'll take advantage of new products and research results.

It Takes Brown To Make Green

Mr. James Urban, FASLA, ISA

Principle of Urban & Associates

For years, the arboricultural profession has supported putting "the right tree in the right place." But, at some point on the road from the forest to Main Street, soil becomes so poor that almost no tree is "right". A new direction is needed. If the goal is to create a diverse urban forest with healthy trees, we need to design the tree's soil environment to meet that expectation. We need to make the space "right" for the tree.

Managing Young Trees after Establishment

Dr. Bruce Fraedrich

Vice President of Research at the F.A. Bartlett Tree Expert Company and the Director of Bartlett Tree Research Laboratories

Once established, young trees are capable of rapid growth, which is often a key management objective. This presentation will address maintenance requirements for young trees with emphasis on structural pruning to en-

sure a desirable form at maturity. Cultural practices to promote growth and to maintain plant vitality will also be presented.

Catered Bar-B-Q luncheon at Ridgeview Park

Afternoon Presentations

Afternoon program: 1:00 – 3:30 pm

Innovations in Soil Management for Landscape Plants

Dr. Bruce Fraedrich

Soil quality is the key to plant health. This outdoor presentation will address key soil conditions that influence landscape plant health, methods for analyzing soil conditions and new products and techniques to improve soil conditions and promote root growth of established landscape trees. The presentation will specifically address proper techniques for soil analysis for nutrient, pH, and soil density (compaction) and interpreting soil test reports.

Tree Kindergarden - In the Playground

Dr. Bonnie Appleton

See the latest techniques and products for propagating, growing, harvesting, holding, and shipping trees. Learn what to look for before purchasing your plant material.

Understanding the Brown

Mr. James Urban

The emphasis on proper soil management before embarking on a landscape project, can not be overstated whether it is one tree or one hundred; the basic principles are the same. State of the art products for engineering sidewalks to sustain healthy trees will also be discussed.

10 Year Highlights
Chain saw give away along with other great door prizes
Special all you can eat Bar-B-Q luncheon
Chain saw carving demonstration

Concurrent Session ArborMaster® Training at Ridgeview Park

Registration: 7:45 - 8:15
Program: 8:15 – 3:30 pm

LOW IMPACT RIGGING SEMINAR

Mr. Rip Tompkins

Safety Trainer and Educator ArborMaster® Training Inc.

This one-day seminar will include discussion and demonstration of various techniques and strategies to improve workplace occupational health and safety while minimizing injuries and dangerous tree removal practices.

Topics covered will include:

- Low-impact rigging strategies & techniques
- Precise, controlled tree cutting and felling techniques
- Command response, risk reduction strategies
- Ergonomics in the arboriculture workplace
- Limb lifting, lowering, and balancing
- Rigging forces and energy distribution management
- Rigging risk assessment and mitigation
